#### Hanover Area School District

15-3 Darwin Presents His Case (continued) Publication of *On the Origin of Species*. Darwin began filling notebooks with his ideas about species diversity and the process that would later be called evolution.

#### Prentice Hall Biology

Prentice Hall Biology. 15-3 Darwin Presents His Case (continued) Inherited Variation and Artificial Selection. One of Darwin's most important insights was that members of each species vary from one another in important ways. Observations during his travels and conversations with plant and animal breeders convinced him that variation existed both in nature and on farms.

#### Prentice Hall Biology

15-3 Darwin Presents His Case (continued) Evolution by Natural Selection. Darwin's next insight was to compare processes in nature to artificial selection. By doing so, he developed a scientific hypothesis to explain how evolution occurs. This is where Darwin made his greatest contribution—and his strongest break with the past.
