Faster Hotter Take Me 4
Microprocessor architects report that since around 2010, semiconductor advancement has slowed industry-wide below the pace predicted by Moore's law. Brian Krzanich, the former CEO of Intel, cited Moore's 1975 revision as a precedent for the current deceleration, which results from technical challenges and is "a natural part of the history of Moore's law".

The solutes increase the freezing point depression which means the water will take longer to freeze. The act of heating or boiling the water removes many of these solutes and contaminates and lessens the freezing point, causing hot water to freeze first. References: Kell, G. S. (1969). "The freezing of hot and cold water". Am. J.
