Paddle Shifters vs Manual Shifters - Racingjunk News

Manual transmissions are going away faster than the landline phone, despite enthusiasts' wails of protest. Automatic transmissions, they say, take passion and command out of driving. Paddle shifters bring some of that joy and control back by allowing drivers to manually shift an automatic transmission with steering-wheel- or steering-column-mounted levers.

What Are Paddle Shifters? | U.S. News & World Report

Paddle shift doesn't require much of a sacrifice in your ability to control the car like previous automatics did. In fact, shift times are much faster in a paddle shift car than you could ever do with a manual. Modern paddle shift cars are very responsive, so the lack of a clutch pedal doesn't really take away from the experience.
